software development for more than a decade*

SANTO DOMINGO, DOMINICAN REPUBLIC

Lead Innovator :	Melvin Perez, Vice President & Chief Software Architect
Employees:	10
Innovative Industry:	Software Technology

### STORY

CAM Informatica is a leading Dominican software development company offering software solutions and custom development for government and corporate clients. As one of the only Microsoft-certified solutions developers in the Caribbean, CAM Informatica's flagship software solution, EasyBank®, is the leading software solution used by small and medium-size banking institutions in the Dominican Republic.

Vice President and Chief Software Architect Melvin Perez founded the company in 1993 after graduating from Pontificia Universidad Catolica Madre & Maestra with a degree in computer engineering. The first IEEE-certified (originally the Institute of Electrical and Electronics Engineers, Inc.) software development professional in the Caribbean, Perez lectures the next generation of software developers at the Instituto Tecnologico de Santo Domingo.

Through its creative design team and innovative intellectual property, CAM Informatica has been highly successful in establishing a reputation for quality service and cutting-edge software solutions in the Dominican Republic and throughout the Caribbean.
